

# Overview

There are a number of jedit plugins, macros, edit modes and other items I've developed over the years.

The goal for this project is to keep track of them and to share for any interested.

## Files

Files are directed in two separate areas:

- Home Directory
  - Mac: /Applications/jEdit.app/Contents/Java
- Settings Directory
  - mac: /Users/proth/Library/jEdit

The following are the set of files that are managed:

- Home
  - macros - automated scripts
  - modes - file edit modes
- Settings
  - abbrevs - text templates / abbreviations
  - keymaps - keyboard shortcut specifications
  - jars - plugins

## Plugins

Current best location:

**North America: Superb Internet (sea2) Seattle**

- Buffer Selector - lists of buffers as tabs
- Character Map - injection of Unicode Characters
- Color Chooser
- Dirty Gutter - lists lines that changed since save.
- FTP - Plugin available through the open dialog

- Hex - hex dumps of files
- HexTools
- Hyperlinks - allow hyperlinks between files
- JDiff Plugin - difference files within jEdit
- JSLinters - updated linters
- Log Viewer
- QuickNotePad
- TextTools
- WhiteSpace - tools to manage whitespace
- XSearch

## Settings

These are the common settings that I tend to use:

- General
  - If files are changed on disk: prompt
- Gutter
  - Show Gutter
  - Enable Line Numbers
- Large Files
  - Ask what to do when opening large files
- Saving & Backup
  - Max number of backups: 0
- Editing
  - Tab width: 4
  - Wrap margin: 80
  - Word wrap: none
  - disable Soft tabs
